ADITYA TIWARI

Gurugram, India | adityatiwari.connect@gmail.com
Portfolio | LinkedIn | GitHub

SUMMARY

Computer Science undergraduate focused on software engineering: data structures and algorithms, object-oriented design and backend development. Writes correct, readable code and documents the design trade-offs behind every project. Seeking a Software Engineering Internship.

EDUCATION

IILM University, Gurugram 2025 – 2029
B.Tech, Computer Science & Engineering | CGPA: 8.79 (after Year 1)

SKILLS

Languages: Java, Python, TypeScript, JavaScript, C
Backend & Data: SQL, Node.js, Express, REST APIs, MongoDB
Frontend: React, Tailwind CSS, HTML, CSS
DevOps & Tools: Linux, Git, GitHub

PROJECTS

Sudoku Algorithm Visualizer React, TypeScript | GitHub

- Implemented four Sudoku search strategies (DFS backtracking, BFS, greedy and MRV) as generators that yield one step at a time, driving an animated solver with pause, single-step and speed control.
- Benchmarks all four on the same board with the same solver code, comparing steps, backtracks and time; step caps keep exponential cases from freezing the browser.

Academic Path Intelligence React, TypeScript, Tailwind CSS | GitHub

- Built a rule-based recommender that turns the skills a student already has into an ordered learning roadmap, using 13 hand-written subject models (level, prerequisites, trigger skills).
- Orders prerequisites with a post-order DFS (topological sort) with cycle protection, so each one is placed ahead of the subject that needs it; skills that map to no subject are flagged instead of guessed at.

Expense Insight Pro React, TypeScript, Recharts | GitHub

- Built an income and expense dashboard in five currencies (USD, EUR, GBP, INR, JPY) with add, edit, undo, search and category filters, plus balance-history and spending-by-category charts.
- Implemented least-squares regression by hand to project the balance 30 days ahead, showing slope and R^2 so the quality of the fit is visible.

EXPERIENCE

Market Research Intern – SEMS Welfare Foundation, Noida Jun 2026 – Jul 2026

- Researched cognitive bias and dual-process theory in strategic procurement decisions using secondary sources, and wrote a full research synopsis with APA-cited references.
- Produced a 23-page internship report aligned to UN SDG 8 (Decent Work and Economic Growth).
