SUMMARY

Computer Science undergraduate who builds data-driven software, from financial dashboards to recommendation engines to algorithm visualizers. Seeking a software development internship (remote, hybrid or on-site).

EDUCATION

IILM University, Gurugram

2025 – 2029

B.Tech, Computer Science & Engineering | CGPA: 8.79 (after Year 1)

EXPERIENCE

Market Research Intern – SEMS Welfare Foundation, Noida

Jun 2026 – Jul 2026

- Researched cognitive bias and dual-process theory in strategic procurement decisions using secondary sources, and wrote a full research synopsis with APA-cited references.
- Produced a 23-page internship report aligned to UN SDG 8 (Decent Work and Economic Growth).

PROJECTS

Academic Path Intelligence

[GitHub](#)

- Built a content-based filtering system that maps students' historical performance and competency profiles to academic trajectories.
- Uses weighted vector similarity to match user skills against curriculum requirements.

Expense Insight Pro

[GitHub](#)

- Financial tracking suite with predictive liquidity forecasting and category-wise budget management.
- Low-latency transactional ledger with dual-axis cash flow visualization.

Sudoku Algorithm Visualizer

[GitHub](#)

- Real-time visualization of the Sudoku backtracking algorithm with adjustable speed and state tracking.
- Shows the recursive solving process step by step.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C

Web: HTML, CSS, React

Tools: Git, GitHub, VS Code, Vercel

Core CS: Data Structures and Algorithms

CERTIFICATIONS

Introduction to Financial Engineering and Risk Management – Columbia University (Coursera). [Certificate](#)
