SUMMARY

Computer Science undergraduate who builds data-driven web apps: a learning-path recommender, a multi-currency expense dashboard with a 30-day forecast, and a visualizer that compares four Sudoku search strategies. Each has a live demo on my portfolio. Seeking a software development internship (remote, hybrid or on-site).

EDUCATION

IILM University, Gurugram

2025 – 2029

B.Tech, Computer Science & Engineering | CGPA: 8.79 (after Year 1)

EXPERIENCE

Market Research Intern – SEMS Welfare Foundation, Noida

Jun 2026 – Jul 2026

- Researched cognitive bias and dual-process theory in strategic procurement decisions using secondary sources, and wrote a full research synopsis with APA-cited references.
- Produced a 23-page internship report aligned to UN SDG 8 (Decent Work and Economic Growth).

PROJECTS

Academic Path Intelligence

React, TypeScript, Tailwind CSS | [GitHub](#)

- Built a rule-based recommender that turns the skills a student already has into an ordered learning roadmap, using 13 hand-written subject models (level, prerequisites, trigger skills).
- Resolves prerequisites with a depth-first walk so each one is placed ahead of the subject that needs it; skills that map to no subject are flagged instead of guessed at.

Expense Insight Pro

React, TypeScript, Recharts | [GitHub](#)

- Built an income and expense dashboard in five currencies (USD, EUR, GBP, INR, JPY) with add, edit, undo, search and category filters, plus balance-history and spending-by-category charts.
- Implemented least-squares regression by hand to project the balance 30 days ahead, showing slope and R^2 so the quality of the fit is visible.

Sudoku Algorithm Visualizer

React, TypeScript | [GitHub](#)

- Animated solver for four strategies (DFS backtracking, BFS, greedy and MRV) with pause, single-step and speed control, showing every placement and backtrack.
- Runs all four on the same board and compares steps, backtracks and time; step caps keep hard boards from freezing the browser.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C

Web: HTML, CSS, React, Tailwind CSS, Vite, Recharts

Tools: Git, GitHub, VS Code, Vercel

Core CS: Data Structures and Algorithms

Coursework: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

Introduction to Financial Engineering and Risk Management – Columbia University (Coursera). [Certificate](#)

Strategy Consulting Job Simulation – BCG (Forage), June 2026. Market research, financial modelling, consumer survey design and data analysis.
